INTERIOR WALL PAINT PRODUCT SYSTEM

01.INORGANIC PAINT

Breathable, durable, and non-combustible. Suitable for public buildings and high-standard interior spaces.

02.LOW-ODOR LATEX PAINT

Low odor, easy to apply, and fine in film texture. Suitable for residential spaces and daily renovation.

03.ANTIBACTERIAL LATEX PAINT

Antibacterial and mildew-resistant, scrub-resistant, and suitable for humid spaces and areas with high usage frequency.

04.ART PAINT

Rich in color and diverse in texture. Suitable for feature walls and high-end decorative spaces.

05.TEXTURE PAINT

Three-dimensional texture and strong decorative expression. Suitable for feature walls and commercial spaces.

06.MICROCEMENT

Seamless texture with a modern minimalist finish. Suitable for integrated wall and floor design.

EXTERIOR WALL PAINT PRODUCT SYSTEM

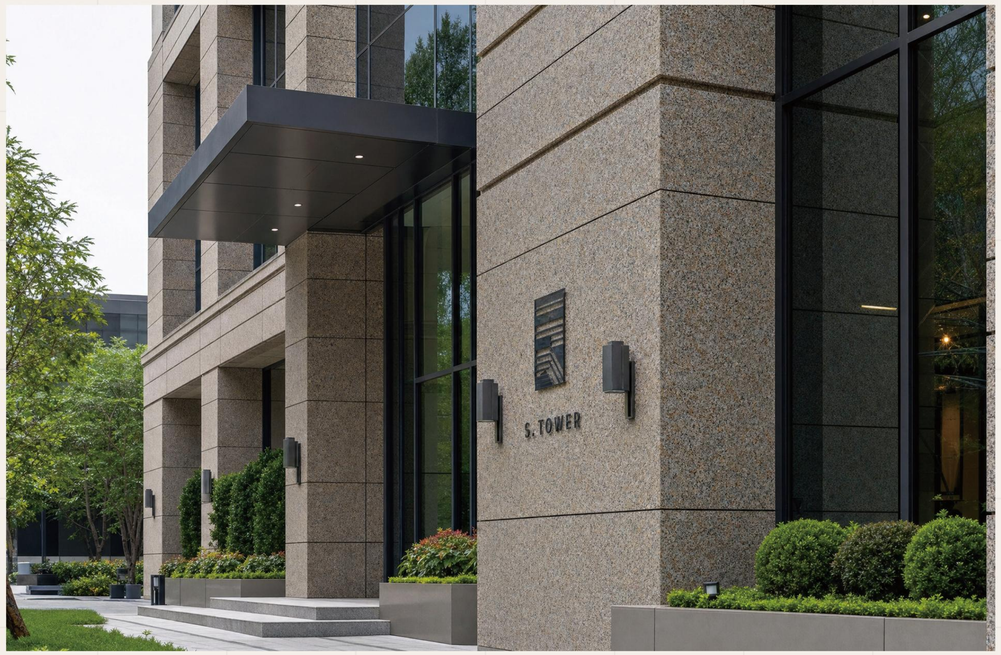

01.GRANITE-LIKE STONE PAINT SERIES

ARCHORA granite-like stone paint creates a three-dimensional finish close to natural stone. It combines decorative quality, weather resistance, and wall protection, and is suitable for residential buildings, apartments, hotels, commercial buildings, and high-end exterior facade projects.

System Features:

- Stone-like texture enhances the decorative effect of exterior facades.
- Elastic crack-bridging helps cover fine substrate cracks.
- Durable weather resistance for long-term outdoor exposure.
- Stain and water resistance makes walls easier to maintain.
- Stable color performance suitable for large facade areas.

02.CROWN CRYSTAL STONE

ARCHORA Crown Crystal Stone is a high-decorative stone-like exterior wall coating with fine surface particles and a stronger stone texture. It helps create a more premium and stable building facade effect, and is suitable for high-end residences, hotels, commercial buildings, clubs, and landmark projects.

System Features:

- Fine stone texture for a facade effect closer to premium natural stone.
- Stable color performance for large exterior walls and key facade areas.
- Premium decorative expression enhances the overall quality of the building.
- Good weather resistance, stain resistance, and water resistance.
- Suitable for entrance areas, podiums, main facades, and high-end exterior wall systems.

03.TEXTURED PAINT

ARCHORA textured paint forms three-dimensional texture effects such as sand wall, brushed texture, and relief texture through troweling, rolling, or spraying. It gives the wall stronger layering and decorative expression, and is suitable for commercial spaces, apartment facades, feature blocks, cultural and tourism buildings, and exterior local feature areas.

System Features:

- Rich three-dimensional textures, including sand wall, brushed, and relief effects.
- Strong decorative expression for distinctive building facades.
- Good covering ability helps weaken minor substrate unevenness.
- Durable weather resistance for long-term outdoor use.
- Flexible application methods allow texture and thickness adjustment according to the design effect.

04.ELASTIC EXTERIOR WALL PAINT

ARCHORA elastic exterior wall paint has good film elongation and can adapt to slight deformation caused by temperature changes. It helps cover and reduce fine substrate cracks. The product also provides waterproofing, breathability, weather resistance, and decorative performance, making it suitable for residential exterior walls, apartment facades, and old-wall renovation projects.

System Features:

- Elastic crack-bridging helps cover fine wall cracks.
- Waterproof and breathable performance reduces rainwater penetration and blistering risk.
- Good weather resistance for long-term outdoor exposure.
- Flexible coating film adapts to temperature variation and slight substrate deformation.
- Suitable for new exterior walls and old-wall renovation protection.

05. EXTERIOR LATEX PAINT

ARCHORA exterior latex paint is suitable for large-area coating of various building exteriors. It offers natural color, convenient application, and uniform film formation. With good weather resistance, stain resistance, and decorative effect, it is suitable for residential buildings, apartments, schools, office buildings, and general commercial exterior facades.

System Features:

- Natural and stable colors suitable for large-area exterior wall applications.
- Convenient application by roller, brush, or spray.
- Smooth and uniform film improves facade cleanliness.
- Weather-resistant, water-resistant, and stain-resistant for easier maintenance.

FUNCTIONAL COATING PRODUCT SYSTEM

01.REFLECTIVE THERMAL INSULATION COATING

ARCHORA reflective thermal insulation coating helps reflect solar radiation and reduce heat accumulation on walls or roofs, improving the temperature performance of building surfaces. It is suitable for exterior walls, roofs, factories, public buildings, and projects requiring thermal insulation and energy saving.

System Features:

- Reflects solar heat and reduces surface temperature rise.
- Suitable for exterior walls, roofs, and large building surfaces.
- Improves building insulation and user comfort.
- Durable weather resistance for long-term outdoor use.
- Can be used with exterior wall and roofing systems.

02.MILDEW-RESISTANT COATING

ARCHORA mildew-resistant coating is suitable for damp, poorly ventilated, or mildew-prone wall environments. It helps reduce mildew growth and keep walls clean. It is suitable for basements, bathroom exterior walls, schools, hospitals, residences, and public spaces.

System Features:

- Mildew-resistant and antibacterial performance reduces mildew problems.
- Suitable for humid and high-frequency-use spaces.
- Fine coating film makes walls easier to clean and maintain.
- Can be used for interior walls and selected functional areas.
- Improves hygiene perception and long-term usage quality.

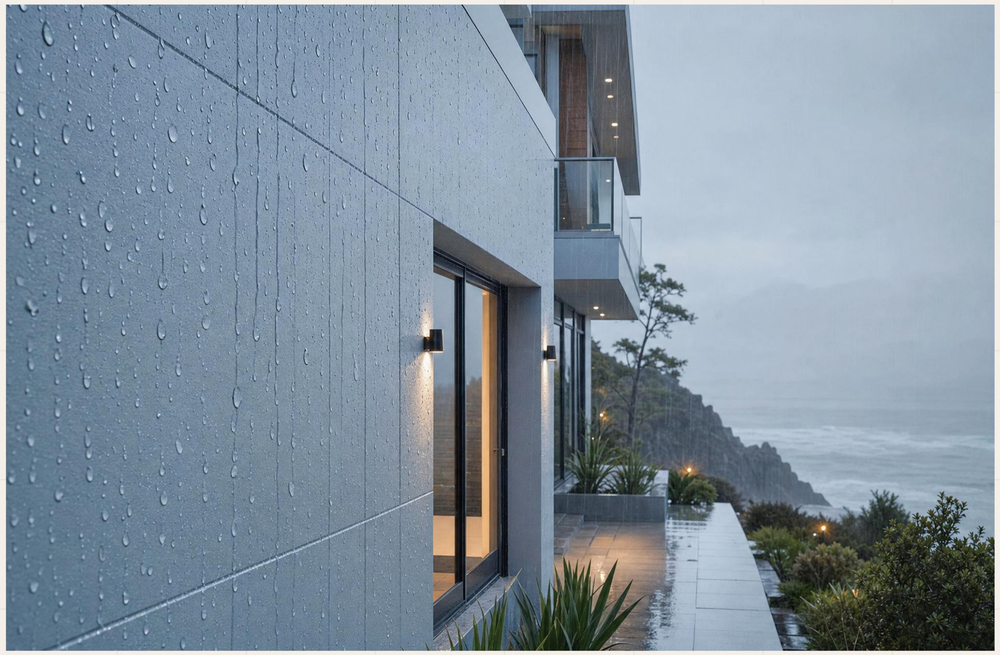

03.WATERPROOF COATING

ARCHORA waterproof coating forms a continuous waterproof membrane on the substrate surface, reducing water penetration and protecting walls and structural substrates. It is suitable for roofs, basements, kitchens, bathrooms, balconies, exterior wall joints, and other waterproofing areas.

System Features:

- Continuous film formation enhances substrate waterproofing protection.
- Applicable to roofs, basements, kitchens, bathrooms, and balconies.
- Good adhesion for multiple substrate conditions.
- Convenient application by brush, roller, or scraper.
- Can be used together with putty, mortar, and protective layer systems.

04. STAIN-RESISTANT SELF-CLEANING

ARCHORA stain-resistant self-cleaning coating is designed for buildings with higher facade cleanliness requirements. By improving coating stain resistance, it helps reduce dust and dirt adhesion and makes walls easier to clean through rainwater washing. It is suitable for residential buildings, apartments, commercial buildings, and high-rise exterior walls.

System Features:

- Stain-resistant performance keeps facades cleaner.
- Facades recover visual cleanliness more easily after rain washing.
- Suitable for high-rise buildings and urban exterior wall environments.
- Stable color performance extends facade decorative effect.
- Can be used with primers, topcoats, and protective finish systems.
