FLOOR COATING PRODUCT SYSTEM

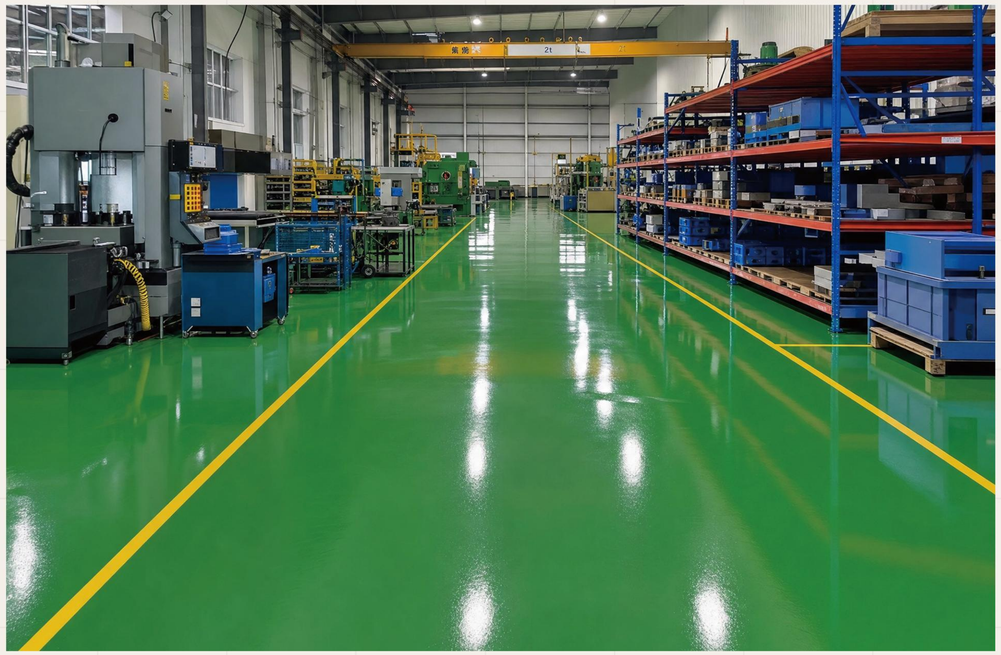

01.EPOXY FLOOR COATING SYSTEM

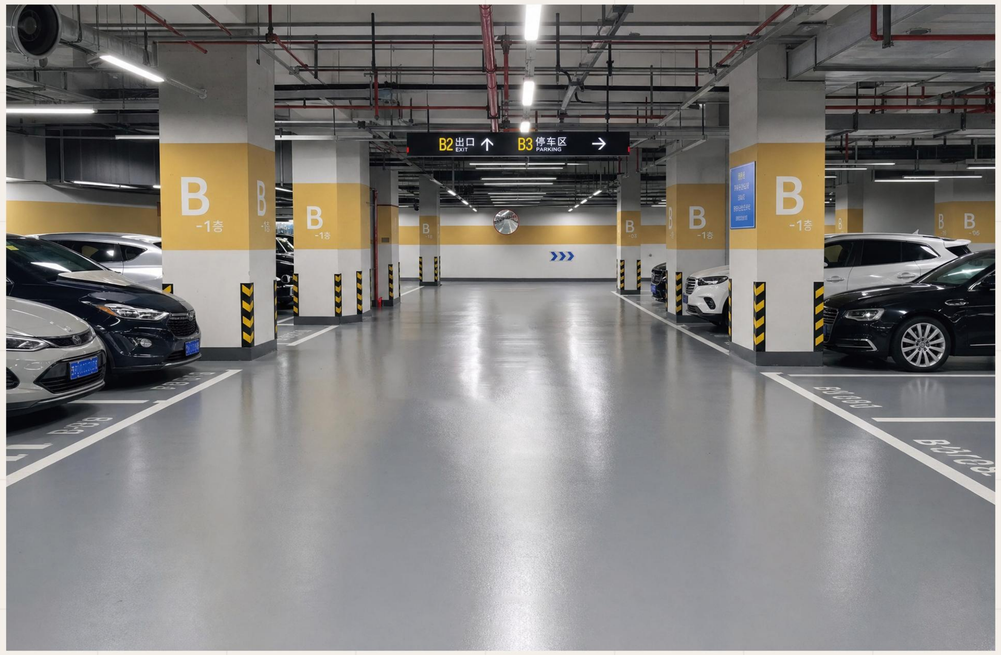

ARCHORA epoxy floor coating is suitable for factories, warehouses, garages, exhibition halls, offices, and commercial spaces. With a dense and smooth film, it provides good adhesion, abrasion resistance, and easy-cleaning performance. According to project requirements, it can be made into flat coating, self-leveling, anti-slip, or colored-chip floor effects.

System Features:

- Smooth and dense film improves overall floor cleanliness.
- Abrasion and pressure resistance for medium to high traffic and vehicle areas.
- Easy to clean and maintain, suitable for industrial and commercial spaces.
- Multiple systems available, including flat coating, self-leveling, and anti-slip.
- Can be matched with primers, intermediate coats, and topcoats to form a com plete flooring system.

02. INORGANIC TERRAZZO FLOOR SYSTEM

ARCHORA inorganic terrazzo floor is composed of inorganic cementitious materials and selected aggregates. After fine grinding and polishing, the surface presents a natural stone texture. The system is environmentally friendly, durable, and strong overall, making it suitable for commercial spaces, schools, hospitals, exhibition halls, transportation spaces, and public building floors.

System Features:

- Inorganic material system, durable and suitable for public spaces.
- Natural stone-like texture with a premium decorative effect.
- Seamless overall surface creates a unified spatial appearance.
- Abrasion and pressure resistance for high-traffic areas.
- Aggregate, color, and surface gloss can be adjusted according to design needs.

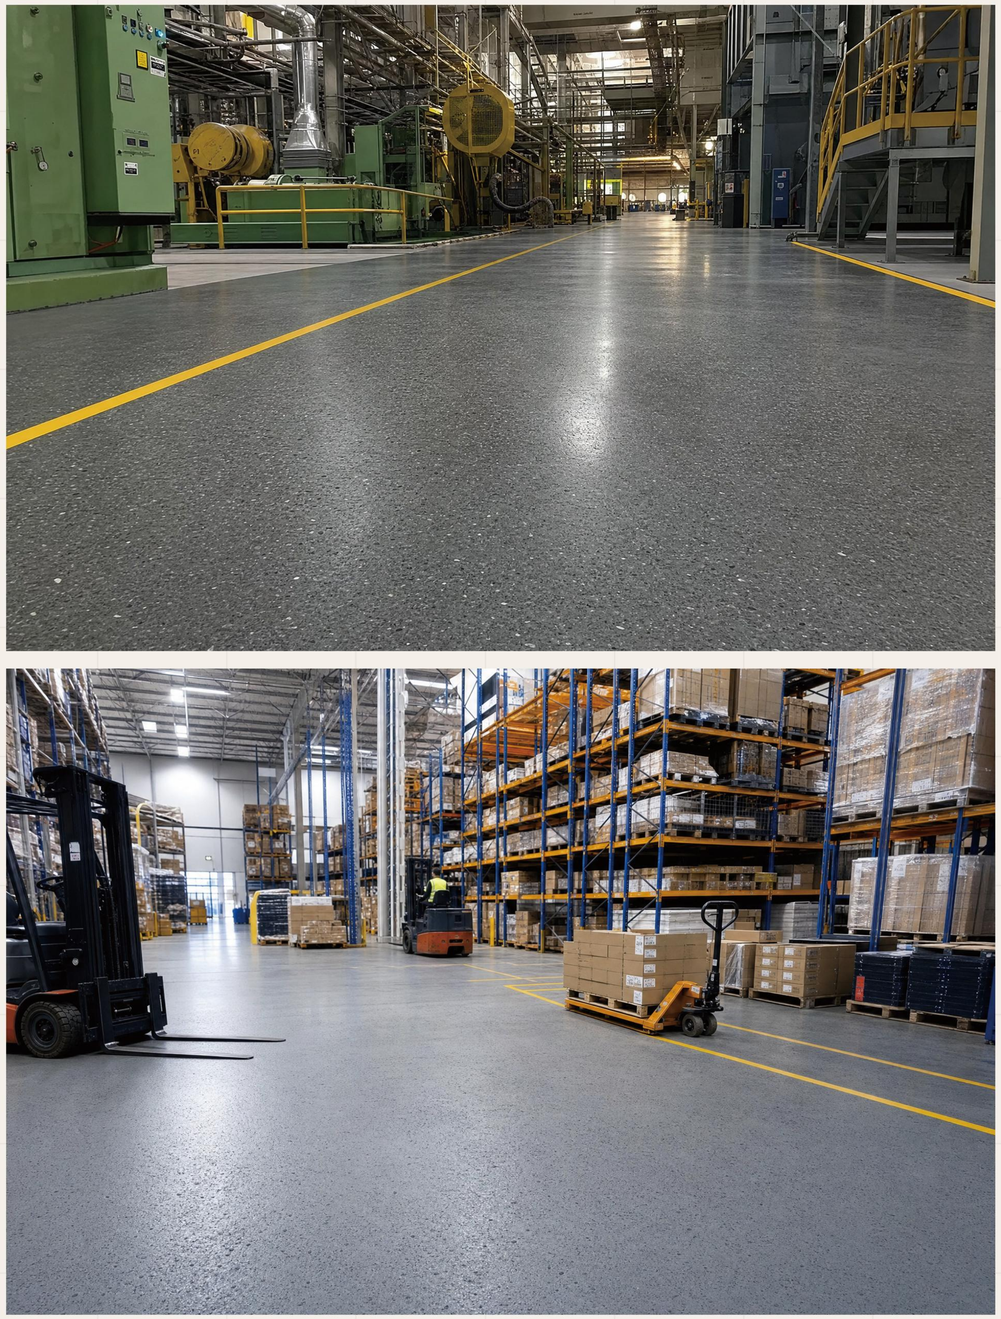

03.FUNCTIONAL WEAR-RESISTANT FLOOR SYSTEM

ARCHORA wear-resistant floor system is suitable for industrial plants, warehouses, logistics centers, underground garages, and large-area hardened floors. By combining wear-resistant aggregates with concrete substrates, it improves surface strength, impact resistance, and abrasion resistance for long-term load-bearing and high-frequency use environments.

System Features:

- High surface strength for industrial and logistics spaces.
- Abrasion and pressure resistance for heavy traffic and vehicle movement.
- Impact-resistant surface suitable for long-term use.
- Easy to clean and maintain for large-area hard floors.
- Can be used in warehouses, garages, factories, and sports or functional areas.

04. COLORED SAND FLOOR

ARCHORA colored sand floor is composed of colored quartz sand and resin materials. It provides rich surface colors, fine texture, decorative effect, anti-slip performance, and abrasion resistance. It is suitable for commercial spaces, exhibition halls, schools, hospitals, office areas, underground garages, and high-quality public floors.

System Features:

- Rich colored sand texture with a natural and fine decorative effect.
- Anti-slip and abrasion-resistant, suitable for public spaces and high-frequency-use areas.
- Customizable colors to meet different spatial design needs.
- Dense surface, easy to clean and maintain.
- Suitable for functional zoning, wayfinding areas, and feature floor designs.
