FUNCTIONAL COATING PRODUCT SYSTEM

01.REFLECTIVE THERMAL INSULATION COATING

ARCHORA reflective thermal insulation coating helps reflect solar radiation and reduce heat accumulation on walls or roofs, improving the temperature performance of building surfaces. It is suitable for exterior walls, roofs, factories, public buildings, and projects requiring thermal insulation and energy saving.

System Features:

- Reflects solar heat and reduces surface temperature rise.
- Suitable for exterior walls, roofs, and large building surfaces.
- Improves building insulation and user comfort.
- Durable weather resistance for long-term outdoor use.
- Can be used with exterior wall and roofing systems.

02.MILDEW-RESISTANT COATING

ARCHORA mildew-resistant coating is suitable for damp, poorly ventilated, or mildew-prone wall environments. It helps reduce mildew growth and keep walls clean. It is suitable for basements, bathroom exterior walls, schools, hospitals, residences, and public spaces.

System Features:

- Mildew-resistant and antibacterial performance reduces mildew problems.
- Suitable for humid and high-frequency-use spaces.
- Fine coating film makes walls easier to clean and maintain.
- Can be used for interior walls and selected functional areas.
- Improves hygiene perception and long-term usage quality.

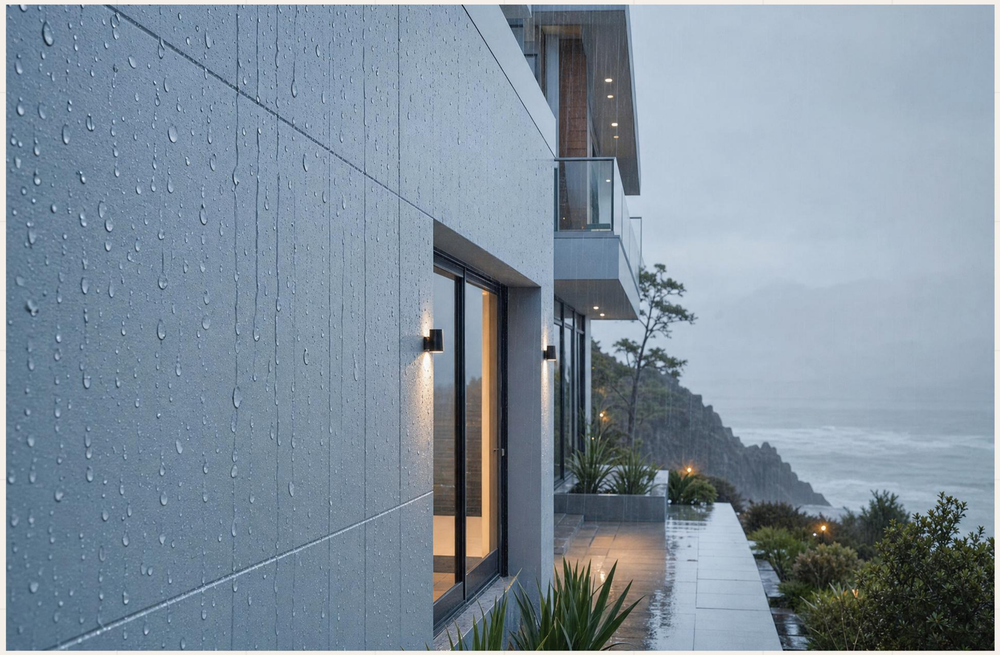

03.WATERPROOF COATING

ARCHORA waterproof coating forms a continuous waterproof membrane on the substrate surface, reducing water penetration and protecting walls and structural substrates. It is suitable for roofs, basements, kitchens, bathrooms, balconies, exterior wall joints, and other waterproofing areas.

System Features:

- Continuous film formation enhances substrate waterproofing protection.
- Applicable to roofs, basements, kitchens, bathrooms, and balconies.
- Good adhesion for multiple substrate conditions.
- Convenient application by brush, roller, or scraper.
- Can be used together with putty, mortar, and protective layer systems.

04. STAIN-RESISTANT SELF-CLEANING

ARCHORA stain-resistant self-cleaning coating is designed for buildings with higher facade cleanliness requirements. By improving coating stain resistance, it helps reduce dust and dirt adhesion and makes walls easier to clean through rainwater washing. It is suitable for residential buildings, apartments, commercial buildings, and high-rise exterior walls.

System Features:

- Stain-resistant performance keeps facades cleaner.
- Facades recover visual cleanliness more easily after rain washing.
- Suitable for high-rise buildings and urban exterior wall environments.
- Stable color performance extends facade decorative effect.
- Can be used with primers, topcoats, and protective finish systems.
