

Elastomeric Exterior Coating

An elastomeric coating option for exterior wall systems that require a flexible finish.

A compiled product summary, not a formally issued TDS, SDS or certification.

When to use this

Exterior wall coating systems. Describe the wall condition and any existing cracks so the preparation and coating approach can be reviewed.

Technical data

No verified test results are listed for this product. See the manufacturer's application information below.

Application & system

Property	Value	Test method / conditions	Document basis
Theoretical coverage / consumption	2.5–3.5 m ² /kg	Source document	Manual V3 2026-07-09
Recommended coats	2 coats	Source document	Manual V3 2026-07-09
Application method	Roller or airless spray	Source document	Manual V3 2026-07-09
Application temperature	5–35 °C	Source document	Manual V3 2026-07-09
Relative humidity	≤85 %	Source document	Manual V3 2026-07-09
Recoat / clear-coat interval	4–6 h at 25°C	Source document	Manual V3 2026-07-09

Source and scope

Original reports may show the manufacturer's other brand name. The company confirms that the corresponding ARCHORA products use the same formulation and specifications.

Manufacturer's manual data is not an independent test report. Reported results apply to the submitted sample and stated test conditions; they do not establish performance on every job site or constitute international certification.
